<b>Strathmore</b> Physical Therapy	Box 2144, 231 Second Ave, Strathmore	403-934-2913	

## Ambulatory Community Physiotherapy (ACPT) Program – Calgary Zone

Physiotherapy services for people meeting specific criteria in Calgary Zone clinics which are contracted by Alberta Health Services.

This program provides early, limited intervention (3-7 visits) for clients that have had a recent decline in their function following muscle, joint, or bone surgery or injury. Physiotherapy treatment and teaching will be offered to help decrease pain, increase strength and flexibility and manage daily activities.

As eligibility requirements differ, an assessment is required to qualify:

- Clients must have a **functional need** that would be expected to respond to physiotherapy, such as stiffness or weakness as a direct result of surgery or fracture.
- Clients must present to the clinic **within 12 weeks of injury or surgery**.
- Clients are expected to **actively participate** in their recovery, both at home and in the clinic.
- Clients with functional deficits from general musculoskeletal **sprain or strain *must qualify under a defined low income category*** to access funding – information available at each clinic.

**\*\* Program appropriateness is evaluated at the clinic level through an assessment. \*\***  
**\*\*A physiotherapist will apply for funding if the client qualifies. \*\***

The following are **NOT** funded under the Ambulatory Community Physiotherapy Program:

- Specialized physiotherapy treatments (e.g. vestibular disorder / vertigo or pelvic floor / incontinence rehab)
- Physiotherapy after non-insured cosmetic surgery
- Clients that are eligible for coverage from other health payers (e.g. WCB, motor vehicle insurance, Veterans' Affairs)
- Clients receiving physiotherapy from another AHS program for the same condition (e.g. Home Care, Community Accessible Rehabilitation, Primary Care Network)

**For more information or to determine eligibility,  
clients should contact a contracted ACPT clinic.**
